INDEX OF AUTHORS VOLUME 4

A

ABBOT, N. J. Access of ferritin to the interstitial space of *Carcinus* brain from intracerebral blood vessels, 99
ALVARADO-MALLART, R.-M. Ultrastructure of muscle fibers of an extraocular muscle of the pigeon, 327
ANDERSON, M. E. *See* SMITH and ANDERSON, 629
ARNOTT, H. J. *See* TEIGLER and ARNOTT, 173

B

BAERWALD, R. J. *See* TEIGLER and BAERWALD, 447
BLOODGOOD, R. A. *See* FITZHARRIS, BLOODGOOD and MCINTOSH, 219
BOROVYAGIN, V. L. *See* ZS.-NAGY and BOROVYAGIN, 73
BOULIGAND, Y. Twisted fibrous arrangements in biological materials and cholesteric mesophases, 189
BROWN, S. C. *See* ENGSTER and BROWN, 505
BURNS, E. R. and SOLOFF, B. L. Nucleolar vacuoles in cells cultured from lung and peritoneum of *Diemictylus viridescens*, 63

C

CAMPBELL, A. C. The form and function of the skeleton in pedicellariae from *Echinus esculentus* L., 647
CHANG, J. H. T. Fixation and embedment *in situ* of tissue culture cells for electron microscopy, 561
CHANUSSOT, B. Etude histologique et ultrastructurale du ganglion ingluvial de *Blabera craniifer* Burm. (Insecte, Dictyoptere), 85
CLARK, W. H. *See* TALBOT, CLARK and LAWRENCE, 271, 613
COGGESHALL, R. E. The structure of the accessory genital mass in *Aplysia californica*, 105
COLEMAN, G. S., and HALL, F. J. Fine structural studies on digestion of bacterial species in the rumen ciliate, *Entodinium caudatum*, 37
CROSSLEY, A. C. The ultrastructure and function of pericardial cells and other nephrocytes in an insect : *Calliphora erythrocephala* 529

D

DANIEL, E. E. *See* GARFIELD, HENDERSON and DANIEL, 692
DANIEL, J. W. and JARLFORS, U. Plasmodial ultrastructure of the myxomycete, *Physarum polycephalum*, 15
—. Light-induced changes in the ultrastructure of a plasmodial myxomycete, 405
DAVIES, D. M. *See* LIU and DAVIES, 1
DAVIES, H. G. *See* SMALL and DAVIES, 341
DESMET, V. *See* DE WOLF-PEETERS, DE VOS and DESMET, 379
DE VOS, R. *See* DE WOLF-PEETERS, DE VOS and DESMET, 379
DE WOLF-PEETERS, C., DE VOS, R. and DESMET, V. Electron microscopy and histochemistry of canalicular differentiation in fetal and neofetal rat liver, 379
DIRKSEN, R. R. and SATIR, P. Ciliary activity in the mouse oviduct as studied by transmission and scanning electron microscopy, 389
DOBBS, G. H. A method for preservation of soft tissues of marine teleosts for scanning electron microscopy, 687

E

ENGSTER, M. S. and BROWN, S. C. Histology and ultrastructure of tube foot epithelia in the phanerozonian starfish, *Astropecten*, 505

F

FISHER, J. M. Fine-structural observations on the gill filaments of the freshwater crayfish *Astacus pallipes* Lereboullet, 287
FITZHARRIS, T. P., BLOODGOOD, R. A. and MCINTOSH, J. R. The effect of fixation on the wave propagation of the protozoan axostyle, 219
FOELIX, R. F. Permeability of tarsal sensilla in the tick *Amblyomma americanum* L. (Acarina, Ixodidae), 129
FRANZINI-ARMSTRONG, C. Studies of the triad. III Structure of the junction in fast twitch fibers, 471

G

GARFIELD, R. E., HENDERSON, R. M. and DANIEL, E. E. Evaluation of the pyroantimonate technique for localization of tissue sodium, 575

GREEN, J. P. and NEFF, M. R. A survey of the fine structure of the integument of the fiddler crab, 137

H

HALL, F. J. *See* COLEMAN and HALL, 37
HENDERSON, R. M. *See* GARFIELD, HENDERSON and DANIEL, 575
HOME, E. M. Centrioles and associated structures in the retinula cells of insect eyes, 227
HUIE, P. *See* LOCKE and HUIE, 601
HUMPHREYS, W. J. *See* WODZICKI and HUMPHREYS, 527
HUNT, S. The fine structure of the smooth muscle in the hypobranchial gland of the gastropod *Buccinum undatum* L., 481

J

JÄRLFORS, U. *See* DANIEL and JÄRLFORS, 15, 405

L

LA FOUNTAIN, J. *See* MASCARENHAS and LA FOUNTAIN, 11
LANE, N. J. *See* SATTELLE and LANE, 253
— and TREHERNE, J. E. Studies on perineural junctional complexes and the sites of uptake of microperoxidase and lanthanum by the cockroach central nervous system, 427
LAUVERJAT, S. Role des cellules zymogenes dans les secretions salivaires de *Locusta migratoria* (Orthoptere, Acridoidea) 301
LAVKER, R. M. Fine structure of the newt epidermis, 667
LAWRENCE, A. L. *See* TALBOT, CLARK and LAWRENCE, 271, 617
LIU, T. P. Ultrastructural changes in the nuclear envelope of larval fat body cells of *Simulium vittatum* Zett. (Diptera: Simuliidae) induced by microsporidian infection of *Thelohania bracteata*, 495
— and DAVIES, D. M. Fine structure of frozen-etched spores of *Thelohania* emphasizing the formation of the polarplast, 1
LOCKE, M. and HUIE, P. The fiber components of insect connective tissue, 601

M

MCINTOSH, J. R. *See* FITZHARRIS, BLOODGOOD and MCINTOSH, 219
MASCARENHAS, J. P. and LA FOUNTAIN, J. Protoplasmic streaming, cytochalasin B and growth of the pollen tube, 11

N

NADELHAFT, I. and SECHRIST, J. W. An unusual central cytoplasmic body in large crayfish neurons: a light and electron microscopic study, 235
NEFF, J. M. Ultrastructural studies of periostracum formation in the hard shelled clam *Mercenaria mercenaria* (L.), 311
—. Ultrastructure of the outer epithelium of the mantle of the clam *Mercenaria mercenaria* in relation to calcification of the shell, 595
NEFF, M. R. *See* GREEN and NEFF, 137
NICKERSON, P. A. Adrenal zona glomerulosa after hypophysectomy in the Mongolian gerbil, 677

P

PELEG, J. and SHAHAR, A. Morphology and behavior of cultured *Aëdes aegypti* mosquito cells, 55

R

RYAN, J. W. *See* SMITH and RYAN, 49
—. *See* SMITH, SMITH and RYAN, 457

S

SANDIFER, J. B. and TOMBES, A. S. Ultrastructure of the lateral neurosecretory cells during reproductive development of *Sitophilus granarius* (L.) (Insecta: Coleoptera), 437
SATIR, P. *See* DIRKSEN and SATIR, 389

gulatory tissue in the developing brown shrimp, *Penaeus aztecus*, 271
—. Ultrastructural observations of the muscle insertion and modified branchiostegite epidermis in the larval brown shrimp, *Penaeus aztecus*, 613
TEIGLER, D. J. and ARNOTT, H. J. Crystal development in the Malpighian tubules of *Bombyx mori* (L.), 173
—. and BAERWALD, R. J. A freeze etch study of clustered nuclear pores, 447
THURESON-KLEIN, Å. Giant mitochondria in Schwann cells of bovine splenic nerve, 521
TOMBES, A. S. *See* SANDIFER and TOMBES, 437
TREHERNE, J. E. *See* LANE and TREHERNE, 427

W

WODZICKI, T. J. and HUMPHREYS, W. J. Cytodifferentiation of maturing pine tracheids: The final stage, 527

Z

ZS.-NAGY, I. and BOROVYAGIN, V. L. Organization of the cytosomal membranes of molluscan neurons under normal and anaerobic conditions as revealed by electron microscopy, 73

INDEX OF SUBJECTS VOLUME 4

A

Adrenal, zona glomerulosa after hypophysectomy in the Mongolian gerbil, EM study, 677
Alveolar cell, great, rat lung, freeze-fractured lamellar body membranes of the, EM study, 457
Arachnid, tick, *Amblyomma americanum* L. (Acarina, Ixodidae), permeability of the tarsal sensilla in the, EM study, 129
Axostyle, protozoan, the effect of fixation on the wave propagation of, light microscopic and EM study, 219

B

Bacteria, fine structural studies of digestion of, in the rumen ciliate, *Entodinium caudatum*, EM study, 37
Blood vessels, access of ferritin to the interstitial space of *Carcinus* brain, from, EM study, 99
Brain, of *Carcinus*, access of ferritin to the interstitial space of, from intracerebral blood vessels, EM study, 99
Branchiostegite epidermis, modified, and the muscle insertion, in the larval brown shrimp, *Penaeus aztecus*, ultrastructural observations of, 613

C

Calcification, of the shell of the clam *Mercenaria mercenaria*, ultrastructure of the outer epithelium of the mantle of, in relation to, EM study, 591
Canalicular differentiation, in fetal and neonatal rat liver, histochemical and EM study, 379
Caveolae, endothelial, substructural features of, EM study, 49
Cellules zymogenes, role des, dans les secretions salivaires de *Locusta migratoria* (Orthoptere, Acridoidea), EM study, 301
Centrioles, and associated structures in the retinula cells of insect eyes, EM study, 227
Chick, early embryo, erythropoiesis in the yolk sac of the, spectrophotometric and EM study, 341
Cholesteric mesophases, and twisted fibrous arrangements in biological materials and, light microscopic and EM study, 189
Cilia, activity in the mouse oviduct, scanning and transmission EM study, 389
Ciliate, rumen, *Entodinium caudatum*, fine structural studies on digestion of bacterial species in, EM study, 37
Clam, hard shelled, *Mercenaria mercenaria* (L.), ultrastructural studies of periostracum formation in, 311
Connective tissue, insect, the fiber components of, EM study, 601
Crab, fiddler, a survey of the fine structure of the integument of, 137
Crayfish, freshwater, *Astacus pallipes* Lereboullet, observations on the gill filaments of, EM study, 287
—, an unusual central cytoplasmic body in large neurone of, light microscopic and EM study, 235
Crystal development, in the Malpighian tubules of *Bombyx mori* (L.), light microscopic and EM study, 173
Cytochalasin B, protoplasmic streaming and growth of the pollen tube, light microscopic study, 11

D

Digestion, of bacterial species, fine structural studies on, in the rumen ciliate, *Entodinium caudatum*, EM study, 37

E

Embedment, and fixation, *in situ* of tissue culture cells, EM study, 561
Endothelium, caveolae of, substructural features of 49
Epidermis, modified branchiostegite, and the muscle insertion, in the larval brown shrimp, *Penaeus aztecus*, ultrastructural observations of, 613
—, newt, fine structure of, 663
Epithelia, tube foot, histology and ultrastrcuture of, in the phanerozonian starfish, *Astropecten* 505
Epithelium, outer, of the mantle of the clam *Mercenaria mercenaria*, ultrastructure of, in relation to calcification of the shell, 541
Erythropoiesis in the yolk sac of the early chick embryo, spectrophotometric and EM study, 341
Eye, of pigeon, ultrastructure of muscle fibers of an extraocular muscle of, light microscopic and EM study, 327

F

Fat body cells, larval, of *Simulium vittatum* Zett. (Diptera: Simuliidae), ultrastructural changes in

the nuclear envelope of, induced by microsporidian infection of *Thelohania bracteata*, 495
Ferritin, access of, to the interstial space of *Carcinus* brain from intracerebral blood vessels, EM study, 99
Fiber components, of insect connective tissue, EM study, 227
Fibrous arrangements, twisted, in biological materials and cholesteric mesophases, light microscopic and EM study, 189
Fixation, the effect of, on wave propagation of the protozoan axostyle, light microscopic and EM study, 219
—, and embedment, *in situ* of tissue culture cells, EM study, 561
Freeze-etch, study of clustered nuclear pores 447
— fracture, lamellar body membranes of the rat lung great alveolar cell, EM study, 457
Frozen-etched spores, of *Thelohania*, fine structure of, emphasizing the formation of the polaroplast, EM study, 1

G

Ganglion, ingluvial, du *Blabera craniifer* (Insecte, Dictyoptère) étude histologique et ultrastructurale de, light microscopic and EM study, 85
Genital mass, accessory, structure of, in *Aplysia californica*, light microscopic and EM study, 105
Gerbil, Mongolian, adrenal zona glomerulosa after hypophysectomy in, EM study, 677
Gill filaments, of the freshwater crayfish, *Astacus pallipes*, Lereboullet, fine structural observations on, 287
Gland, hypobranchial, of the gastropod *Buccinum undatum* L., the fine structure of the smooth muscle in, 481

H

Hypobranchial gland, of the gastropod *Buccinum undatum* L., the fine structure of the smooth muscle in, 481
Hypophysectomy, adrenal zona golmerulosa after, in the Mongolian gerbil, EM study, 677

I

Insect, *Aëdes aegypti*, morphology and behaviour of cultured cells of, light microscopic and EM study, 55
—, *Blabera craniifer* Burm. (Insecte, Dictyoptère), étude histologique et ultrastructurale du ganglion de, light microscopic and EM study, 85
—, *Bombyx mori* (L.), crystal development in the Malpighian tubules of, 173
—, *Calliphora erythrocephala*, the ultrastructure and function of pericardial cells and other nephrocytes in, 529
—, cockroach, central nervous system, studies on perineural junctional complexes and the sites of uptake of microperoxidase and lanthanum, EM study, 427
—, connective tissue, the fiber components of, EM study, 601
—, eyes, centrioles and associated structures in the retinula cells of, EM study, 227
—, *Locusta migratoria* (Orthoptère, Acridoidea), role des cellules zymogenes dans les secretions salivaires de, EM study, 301
—, *Simulium vittatum* Zett. (Diptera: Simuliidae) ultrastructural changes in the nuclear envelope of larval fat body cells of, induced by microsporidian infection of *Thelohania bracteata*, 495
—, *Sitophilus granarius* (L.) (Insecta: Coleoptera), ultrastructure of the lateral neurosecretory cells of, during reproductive development, 437
Integument, of the fiddler crab, a survey of the fine structure of, 137
Ionic movements, architecture of gastropod central nervous tissues in relation to, EM study, 253

J

Junctional complexes, perineural, studies on, and the sites of uptake of microperoxidase and lanthanum by the cockroach central nervous system, EM study, 427

L

Lanthanum, and microperoxidase, sites of uptake of, by the cockroach central nervous system, studies on perineural junctional complexes and, EM study, 427
Liver, fetal and neonatal rat, canalicular differentiation in, histochemical and EM study, 379
Lobster, *Homarus americanus*, the disposition of membrane systems in cardiac muscle of, EM study, 629
Lung, and peritoneum, nucleolar vacuoles in cells cultured from, in *Diemictylus viridescens*, light microscopic and EM study, 63
—, rat, great alveolar cell, freeze-fractured lamellar body membranes of the, EM study, 457

M

Malpighian tubules, of *Bombyx mori* (L.), crystal development in, 173
Membrane systems, disposition of, in cardiac muscle of a lobster, *Homarus americanus*, EM study, 629
—s, cytosomal, organization of in molluscan neurons, under normal and anaerobic conditions, as revealed by electron microscopy, 73
— freeze-fractured lamellar body of the rat lung great alveolar cell, EM study, 457

Mesophases, cholesteric, and twisted fibrous arrangements in biological materials and, light microscopic and EM study, 189
Microperoxidase, and lanthanum, sites of uptake of, by the cockroach central nervous system, studies on perineural junctional complexes and, EM study, 427
Microsporidian, *Thelohania bracteata*, ultrastructural changes in the nuclear envelope of larval fat body cells of *Simulium vittatum* Zett. (Diptera: Simuliidae), induced by infection of, 495
Mitochondria, giant, in Schwann cells of bovine splenic nerve, EM study, 521
Mollusc, *Aplysia californica*, the structure of the accessory genital mass in, light microscopic and EM study, 105
—, *Buccinum* L., the fine structure of the smooth muscle in the hypobranchial gland of, 481
—, clam, *Mercenaria mercenaria*, ultrastructure of the outer epithelium of the mantle of, in relation to calcification of the shell, EM study, 591
—, gastropod, architecture of central nervous tissues in relation to ionic movements, EM study, 253
—, *Mercenaria mercenaria* (L.), ultrastructural studies of periostracum formation in, 311
Mouse, oviduct, ciliary activity in, scanning and transmission EM study, 389
Muscle, cardiac, of a lobster, *Homarus americanus*, disposition of membrane systems in, EM study, 629
—, extraocular, of the pigeon, ultrastructure of fibers of, light microscopic and EM study, 327
—, fast twitch fibers, structure of triad, the junction in, EM study, 471
—, insertion, and modified branchiostegite epidermis in the larval brown shrimp, *Penaeus aztecus*, ultrastructural observations of the, 617
—, smooth, the fine structure of, in the hypobranchial gland of the gastropod *Buccinum undatum* L., 481
Myxomycete, *Physarum polycephalum*, plasmodial ultrastructure of, EM study, 15
—, plasmodial, light-induced changes in the ultrastructure of, 405

N

Nephrocytes, and pericardial cells, the ultrastructure and function of in an insect, *Calliphora erythrocephala*, 529
Nervous system, access of ferritin to the interstial space of *Carcinus* brain from intracerebral blood vessels, EM study, 99
—, architecture of gastropod central nervous tissues in relation to ionic movements, EM study, 253
— —, cockroach central, studies on perineural junctional complexes and the sites of uptake of microperoxidase and lanthanum by, EM study, 427
— —, ganglion ingluvial, du *Blabera craniifer* (Insecte, Dictyoptère), étude histologique et ultrastructurale de, light microscopic and EM study, 85
— —, giant mitochondria in Schwann cells of bovine splenic nerve, 521
— —, organization of the cytosomal membranes of molluscan neurons, under normal and anearobic conditions as revealed by electron microscopy, 73
— —, permeability of tarsal sensilla in the tick *Amblyomma americanum* L. (Acarina, Ixodidae), 129
— —, an unusual central cytoplasmic body in, light microscopic and EM study, 235
Neurons, crayfish, an unusual central cytoplasmic body in, light microscopic and EM study, 235
—, molluscan, organization of the cytosomal membranes of, under normal and anaerobic conditions as revealed by electron microscopy, 73
Neurosecretory, cells, lateral, ultrastructure of, during reproductive development of *Sitophilus granarius* (L.) (Insecta: Coleoptera), 437
Newt, epidermis, fine structure of, 663
Nuclear envelope, of larval fat body cells of *Simulium vittatum* Zett. (Diptera: Simuliidae), ultrastructural changes in, induced by microsporidian infection of *Theolohania bracteata*, 495
— pores, clustered, a freeze-etch study of, 447
Nucleolar vacuoles, in cells cultured from lung and peritoneum of *Diemictylus viridescens*, light microscopic study, 63

O

Osmoregulatory tissue, in the developing brown shrimp *Penaeus aztecus*, light microscopic and EM study, 271
Oviduct, mouse, ciliary activity in, as studied by transmission and scanning electron microscopy, 389

P

Pedicellariae, the form and function of the skeleton in, from *Echinus esculentus* L. 647
Pericardial cells, and other nephrocytes, the ultrastructure and function of in an insect, *Calliphora erythrocephala*, 529
Periostracum, formation in the hard shelled clam *Mercenaria mercenaria* (L.), ultrastructural studies of, 311
Permeability, of tarsal sensilla in the tick *Amblyomma americanum* L. (Acarina, Ixodidae), 129
Physarum polycephalum, myxomycete, plasmodial ultrastructure of, EM study, 15
Pigeon, ultrastructure of muscle fibers of an extraocular muscle of, light microscopic and EM study, 327
Pine, tracheids, cytodifferentiation of maturing, transmission and SEM study, 527
Plasmodial myxomycete, light-induced changes in the ultrastructure of, 405
— ultrastructure, of the myxomycete *Physarum polycephalum*, EM study, 15

Polaroplast, formation of, in frozen-etched spores of *Thelohania*, 1
Pollen tube, growth of, light microscopic study 11
Protoplasmic streaming, cytochalasin B and growth of the pollen tube, light microscopic study, 11
Protozoan axostyle, the effect of fixation on the wave propagation of, light microscopic and EM study, 219
Pyroantimonate technique, for localization of tissue sodium, evaluation of the, 579

R

Rat, fetal and neonatal, liver of, electron microscopy and histochemistry of canalicular differentiation in, 379
Retinula cells, of insect eyes, centrioles and associated structures in, EM study, 227

S

Scanning electron microscopy, a method for preservation of soft tissues of marine teleosts for, 691
Schwann cells, of bovine splenic nerve, giant mitochondria in, 521
Secretions salivaires, role des cellules zymogenes dans, de *Locusta migratoria* (Orthoptère, Acridoidea), EM study, 301
Sensilla, tarsal, permeability of, in the tick *Amblyomma americanum* L. (Acarina, Ixodidae), 129
Shrimp, *Penaeus aztecus*, developing, light and EM studies on osmoregulatory tissue in, 271
Skeleton, in pedicellariae, from *Echinus esculentus* L., the form and function of the, 651
Sodium, tissue, evaluation of the pyroantimonate technique for localization of, 579
Spores, frozen-etched, of *Thelohania*, fine structure of emphasizing the formation of the polaroplast, EM study, 1
Starfish, phanerozonian, *Astropecten*, histology and ultrastructure of tube foot epithelium in, 505

T

Technique, pyroantimonate, for the localization of tissue sodium, evaluation of, 575
Teleosts, marine, a method for preservation of soft tissues of, for scanning electron microscopy, 687
Tissue culture cells fixation and embedment of, *in situ*, for electron microscopy, 565
— — morphology and behaviour of cells of mosquito, *Aëdes aegypti*, light microscopic and EM study, 55
— — nucleolar vacuoles in cells from lung and peritoneum of *Diemictylus viridescens*, light microscopic and EM study, 63
Tracheids, maturing pine, cytodifferentiation of, the final stage, transmission and SEM study, 527
Triad, studies of the, III Structure of the junction in fast twitch fibers, EM study, 471

Y

Yolk sac, of the early chick embryo, erythropoiesis in, light microscopic and EM study, 341

Z

Zona glomerulosa, adrenal, after hypophysectomy in the Mongolian gerbil, EM study, 677
